ASCII EXERCISES

Summer in JAPAN 2016: Computer Science Workshop

1.) Convert each ASCII decimal number into a letter/character.

ASCII	Letter
67	С
116	
36	
98	
90	

2.) Write your name in binary! Capitalize the first letter. Use the chart.

Example:

 $\begin{array}{l} \mid S \mid t \mid e \mid v \mid e \mid \\ \mid 01010011 \mid 01110100 \mid 01100101 \mid 01110110 \mid 01100101 \mid \end{array}$

3.) Decipher this message by converting the ASCII decimal number into letters/characters.

 $|\ 72\ |\ 101\ |\ 108\ |\ 108\ |\ 111\ |\ 32\ |\ 83\ |\ 73\ |\ 74\ |\ 33\ |$

Bonus: Convert the message into binary!

4.) Evaluate these Boolean expressions with either True or False.

	True or False?
a < g	
B > 0	
s < h	
M > R
